The City withdraws fresh water from the Biscayne Aquifer utilizing 12 raw water wells. In 2005, the City's Water Treatment Plant (WTP) was permitted by South Florida Water Management District (SFWMD) to withdraw 9.3 mgd (million gallons per day). This was later reduced to 8.51 mgd in 2010 per the 2007 Regional Water Availability Rule, which restricted withdrawals from specified waterbodies, including the Biscayne Aquifer, and required utilities to explore non-traditional sources and strategies to accommodate future water demands. An analysis of several water supply alternatives, identified the C-51 Reservoir Project as the most affordable and sustainable option. The C-51 Capacity Allocation Agreement was executed on December 4, 2019, per Resolution 19-127.

**OPERATING BUDGET IMPACT:**

The City will be required to contribute its pro rata share of the operating and maintenance costs of the Reservoir annually after the Commercial Operation Date, anticipated in Fiscal Year 2023.
